

Integrated Situation: Medical Recruitment Platform

In countries like Rwanda and across East Africa, hospitals and clinics frequently struggle to find qualified doctors—especially specialists and professionals willing to work in rural or underserved areas. At the same time, many doctors face difficulty identifying suitable job opportunities that match their skills, preferred locations, and career goals.

To address this gap, you are developing a digital platform using node.js (e.g., *MedLink Africa* or *DoctorConnect*) that connects doctors with hospitals and clinics efficiently. Initial rollout can target: Rwanda, Kenya, Uganda and, Tanzania.

Integrated Platform Model

1. Core Purpose

The platform acts as a centralized recruitment system where:

- Doctors showcase their qualifications and preferences
- Hospitals find and recruit suitable candidates quickly

The goal is to reduce hiring delays, improve healthcare access, and streamline recruitment workflows.

2. System Users

A. Doctors

Doctors use the platform to:

- ✚ Create professional profiles
- ✚ Upload CVs and medical licenses
- ✚ Indicate specialties (e.g., cardiology, pediatrics)
- ✚ Set preferred work locations (urban/rural)
- ✚ Apply for available positions

B. Hospitals / Clinics

Healthcare institutions use the platform to:

- ✚ Post job vacancies
- ✚ Search and filter doctors
- ✚ Review qualifications and experience
- ✚ Contact and shortlist candidates

- ✚ Schedule interviews

3. Platform Workflow

1. A hospital posts a job vacancy (e.g., “General Practitioner – Rural Clinic”)
2. Doctors receive notifications or browse available jobs
3. Interested doctors apply through the platform
4. The system suggests best-fit candidates using matching criteria
5. Hospital reviews applications and contacts selected doctors
6. Interviews are scheduled within the platform
7. A doctor is selected and hired

4. Key Features

Doctor Profile System

- ✚ Personal and professional details
- ✚ Specialty and experience level
- ✚ Uploaded CV and certifications
- ✚ Preferred salary and job location

Hospital Dashboard

- ✚ Job posting interface
- ✚ Candidate search and filtering
- ✚ Messaging system
- ✚ Interview scheduling tools
