

Integrated Situation: Electronic Student Portfolio System

An Electronic Portfolio (e-Portfolio) system is designed to record, manage, and track all important academic and personal development details related to students in an educational institution.

Purpose:

The system provides a centralized digital platform where students, teachers, and administrators can store and access student information efficiently.

Users:

Students:

- Create and update personal profiles
- Upload assignments, projects, and certificates
- Track academic progress
- Showcase achievements

Teachers:

- Record grades and assessments
- Upload feedback on student work
- Monitor student performance
- Approve submitted portfolios

Administrators:

- Manage student records
- Generate reports
- Monitor overall academic performance
- Ensure data accuracy and security

System Workflow:

1. Student registers and creates a profile
2. Student uploads academic work and achievements
3. Teacher reviews and provides feedback
4. System stores and updates performance records
5. Reports are generated for evaluation
6. Portfolio grows over time as a complete student record

Key Features:

- Student Profile Management
- Academic Records Storage
- Assignment and Project Upload
- Feedback and Assessment System
- Progress Tracking Dashboard
- Reporting and Analytics
- Secure Data Storage
